

The right care, at the right place, at the right time...

What Telehealth Can Do For You

Saves travel time and costs for patients, especially in rural areas

Provides quality life-saving, routine, or preventive health care

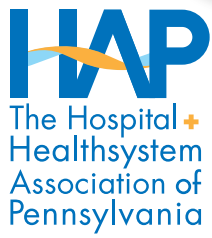

Helps address the shortage of health care providers, including behavioral health

Improves access to health care services and specialists

Offers convenient health care on your time schedule

Offers an alternative for health care in certain medical situations

Telehealth delivers important—sometimes life-saving—health care services using two-way video, smartphones, and other tools.

Telehealth expands your access to high-quality health care, saving you time and money.
